Profile summary

I'm a seasoned full-stack developer with 5+ years of experience in media, SaaS, and e-commerce. Proficient in Full Stack development, I specialize in technologies like React, Next.js, Node.js, TypeScript, JavaScript, PHP, Yii, and database management. I have a strong track record in building RESTful APIs, creating seamless cross-browser interfaces, and implementing AWS-based solutions. I'm known for my problem-solving abilities, teamwork, and adaptability in fast-paced environments.

CORE COMPETENCIES

Hard skills:

- **Full Stack:** Media, SaaS, and E-commerce industries using JavaScript, TypeScript, PHP
- **Frontend:** HTML/CSS, SCSS, Bootstrap, React/Material-UI, Next.js/Tailwind providing user interface design and responsive development
- **Backend:** Node, Express, Nest, PHP, Laravel, Yii providing RESTful API development, Server-side scripting
- **Database Management:** MySQL/MariaDB, PostgreSQL providing data modeling, query optimization
- **CI/CD and Cloud Services:** Docker, GIT, and AWS provide continuous integration, deployment automation, cloud infrastructure
- **QA:** Unit testing (PHPUnit, Jest), Integration testing (Cypress js), Manual testing (Jira checklists), Selenium tests (maintained legacy Java 8 tests)

Soft skills:

- Collaboration and Teamwork: Experience working in an Agile team, strong communication skills
- Problem-Solving and Troubleshooting: Effective issue resolution and debugging skills
- Adaptability and Fast Learner: the ability to quickly grasp new technologies and adapt to changing project requirements

PROFESSIONAL EXPERIENCE

Sigma Software, Full stack developer, remote (in Ukraine)

2020 – 2023

The purpose of working at this company is to provide development and maintenance on both front-end and back-end parts of the Viaplay project which takes a vast European market in the media and streaming industry.

Duties:

- Working with multi-purpose teams to build and support the platform's features and functionality.
- Team collaboration to solve technical challenges to get better user experiences
- QA manual/automation testing and participation in code reviews to provide feedback and organize technical discussions
- Bug fixing and troubleshooting customer's issues

Achievements:

- Took the lead on a key front-end application and rewrote it from old technology to new one, leading to its successful launch.
- Implemented a b2b CRM system which has helped provide the best customer service for b2b account managers and helped partners clearly understand the membership status.
- Improved the performance of one of the key metrics pages so it started loading 6x times faster
- Twice the leader of internal hackathons presented cool features for product
- Mentorship assistance for the newcomer by providing meeting sessions, documentation, and on-call assistant

Altexsoft, Junior full stack developer, (work at the office in Ukraine, Kharkiv)

2017 – 2020

My role at this company is to contribute to projects as an outsourced resource. I was pivotal in supporting the senior developers and the team in delivering high-quality solutions and meeting project deadlines. I have been on 4 different projects related to SaaS and E-commerce industries.

Duties:

- *My main responsibilities were assisting in the design, development, and maintenance of web applications for the company's clients*
- Bug fixing, QA manual testing, and team collaboration

Achievements:

- My greatest achievement is adaptability and learning from mistakes: no matter how big and challenging tasks I've had I always convert them to learnings during projects.
- After re-developing the order process one of the e-commerce projects got great feedback from the Product Owner
